### DSCP Awards Long Term Contracts for Fire Fighting Apparatus

The Heavy Equipment Procurement Program (HEPP) at DSCP has finalized Multiple Award Requirements Contracts with various fire apparatus manufacturers in order to provide fire fighting vehicle support for DLA customers. Product lines include: Rescue Vehicles; Tankers; ARFF Vehicles; Brushfire, Wildfire, Hazmat and Command Vehicles; Pumpers and various styles of Aerials. In addition, DSCP has awarded Glider Kit Programs with Emergency-One, Inc. and Pierce Manufacturing, Inc. as an option to assist our customers in overhauling older vehicles, while offsetting the cost of procuring new vehicles. Also, the HEPP contracts offer a full range of support packages for each vehicle that can be acquired at the time the vehicle is procured. These packages can include: training; service plans; spare parts support and extended warranties. Manufacturers awarded contracts, thus far, are: Pierce Manufacturing; Emergency One; Oshkosh Truck; KME Fire Apparatus; West-Mark and Waltek Motor Trucks. These contracts are in addition to the existing long term contracts in place with S&S Fire Apparatus (Tankers, Pumpers and Brush Trucks). HEPP's fire apparatus program offers numerous benefits to the customer. Some of these benefits are:

- ◆ Quick and simple ordering
- ◆ Reduced Procurement Cost – Leveraged Buys
- ◆ Cradle to Grave Management
- ◆ Dedicated Customer Service
- ◆ Full range of options available
- ◆ Low Cost Recovery Factor – 1%

In addition, new contracts are always being developed to broaden the range of support. These contracts are the tools that provide quick delivery, competitive prices and a broad range of choice to DSCP customers.
